

Business in ICT field and in lift and elevator technology

About The TTC TELSYS, a.s. Company

We are a Czech technology company with its own design and development center. We strive to cooperate with mutual benefit and we are a partner who will find optimal solutions even for complex technical tasks. We draw inspiration from our rich experience and above all from the skills and knowledge of our employees. We are one of the stable companies and thanks to this we are able to guarantee the quality of our products and services to our customers.

In the field of ICT, our main product is the on-line application TOUCHGUARD, designed especially for planning, monitoring and control of performed activities. We continuously develop the application and provide its operation as well as technical support to customers. Our customers are security and cleaning agencies, real estate management and maintenance companies, service and technology companies and various industrial companies.

We have been dealing with electronics for lifts for more than 15 years. We design and develop, manufacture and supply electronics for elevator control and complex elevator switchboards. One of the strengths of the company is that, as an independent manufacturer of elevator electronics, we can find technical solutions for different requirements of our customers. Using our electronics, simple dining lifts can be operated as well as freight or passenger lifts of different types and designs.

The TTC TELSYS, a.s. Company has been a member of the Czech investment group TTC for more than 20 years.

ABOUT THE TTC GROUP

The TTC and its subsidiaries operate mainly in the field of modern technologies and real estate. The TTC Group consists of nearly twenty companies based in the Czech Republic, Slovakia, Russia and Ukraine. Customers from 22 countries rely on our ICT expertise.

The TTC investment group achieves a consolidated turnover of almost CZK 800 million, consolidated equity makes almost CZK 1.5 billion and the total assets of the Company has made CZK 1.9 billion. More than 250 employees work in all TTC Group companies. We focus our business primarily on areas where we can build on the experience and high expertise of our employees.

BUSINESS IN ICT FIELD

The TTC investment group's business in the area of modern technologies is realized through subsidiaries with a robust professional and economic background. In addition to the above-mentioned company TTC TELSIS, we will briefly introduce some other important group members.

The TTC MARCONI is continuously one of the leading Czech system integrators in the field of ICT and is also one of the major manufacturers and suppliers of key elements of communication infrastructure. It offers high-tech products and solutions.

The TTC TELEKOMUNIKACE builds success on its own products, originally mass-deployed in telecommunication networks. Over time, specialized systems have been developed and optimized for secure and safe deployment in critical infrastructure.

The TTC TELEPORT data centres are equipped with unique technologies and state-of-the-art facilities. They feature sophisticated security functions and an open and transparent business model. The TTC TELEPORT operates two data centres. The TTC DC2 is even the largest collocation center in the Czech Republic with 34 data rooms and a total area of 4,000 m² of customer space.

BUSINESS IN REAL ESTATE FIELD

The business of the Czech investment group TTC in the real estate market is realized primarily through the TTC REAL ESTATE Company which manages, modernizes and develops the administrative and industrial premises of the TTC Group and offers space for rent. An ideal business place was found not only by the companies belonging to the TTC holding but also by external tenants who operate in various fields.

- We rent 89 thousand m² of commercial space.
- Occupancy reaches 99 % of the rental space
- There are more than 120 tenants in the premises owned and managed by the TTC Investment Group
